

## *I am Unique – Teachers Instructions*

1. Split the class into groups or complete the activity as a whole class
2. Using a dice go round in a circle and ask each student to roll the dice and see which number they get
3. Depending what number they get they answer the question which corresponds according to the below
4. Some of the questions will produce an answer that someone else in the class will also say and some will be completely different and unique to that child
5. Explain that although we are different we may have similarities – 2 children may have blonde hair but one may be curly and one short and straight so we are still all unique and special

Tell us your favourite food

Tell us your favourite animal

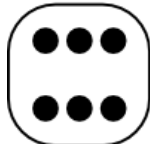

Tell us the colour of your eyes

Tell us your full name

Tell us something that you like about yourself

Tell us the colour of your hair
